

Connect Your Device

The Hotel Rival offers our guests the possibility to connect devices such as laptops, tablets or smart phones directly to a JackPack.

When the device is connected to the JackPack you can use Apps on your device and display the content directly on the Samsung LED TV that is installed in all of our rooms. Enjoy your own subscriptions* on Netflix, HBO, Spotify etc.

Most of the modern tablets and smart phones have support for this feature, and we have adapters and cables for the most popular models on the markets, such as Samsung, Apple, Sony, Blackberry and HTC. You can also connect your laptop to the JackPack, and we have standard cables for this.

If you want to play music on the TV or in the bathroom there is also a separate connection where you can plug in your smart phone or your MP3 player. Did you forgot your charger at home? No problem, we have cables so you can recharge your device via the JackPack.

For assistance, please contact the front desk (930) and we will bring the cables and of course assist in connect your device to the JackPack.

We will charged your room account if cables aren't returned at check out.

** Local restrictions may apply and will maybe require a VPN-connection to the region where your application is licensed. Please check that the terms and conditions for the service you are about to use allows connection via VPN-services.*
